

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended): A display device, the surface of the device being rendered touch-sensitive, the device comprising :

a first dedicated part ~~comprising~~ having two insulating plates (1, 2),

a layer  $[(3)]$  of material exhibiting electro-optical properties suitable for rendering all or part of its surface visible under the effect of an electrical control signal, the layer  $[(3)]$  being disposed between the two plates  $[(1, 2)]$ ,

at least one first electrode  $[(4, 5)]$  having the shape of a pictogram, the

at least one first electrode  $[(4, 5)]$  being disposed on a face  $[(6)]$  of one  $[(2)]$  of the insulating plates,

a second electrode  $[(7)]$  disposed on a face  $[(8)]$  of the other  $[(1)]$  insulating plate opposite at least one first electrode  $[(4, 5)]$ ,

~~characterized in that~~ wherein the second electrode  $[(7)]$  is used as responsive element of the touch-sensitive surface of the device, in that the surface area of the second electrode  $[(7)]$  is at least  $9\text{ mm}^2$ ,

and in that the surface area of the second electrode  $[(7)]$  is greater than or equal to the surface area or the sum of the surface areas of the first electrode or electrodes  $[(4, 5)]$  opposite.

2. (currently amended): The device as claimed in claim 1, ~~characterized in that~~ wherein the first electrode  $[(4, 5)]$  is fed electrically by a pad  $[(9, 11)]$  in that the second electrode  $[(7)]$  is profiled opposite the pad  $[(9, 11)]$ .

3. (currently amended): The device as claimed in ~~one of the preceding~~ claim $[(s)]$  1, ~~characterized in that~~ wherein it comprises several second electrodes  $[(7)]$ , and in that each second electrode  $[(7)]$  is fed separately.

4. (currently amended): The device as claimed in ~~one of the preceding claim~~[[s]] 1, ~~characterized in that~~ wherein the pattern of the second electrode ~~[(7)]~~ covers substantially a circle of at least 9 mm in diameter.

5. (currently amended): The device as claimed in ~~one of the preceding claim~~[[s]] 1, ~~characterized in that~~ wherein it comprises a second non-dedicated part.

6. (currently amended): The device as claimed in claim 5, ~~characterized in that~~ wherein the second non-dedicated part is arranged in the form of a matrix with row-wise and column-wise addressing.

7. (new): The device as claimed in claim 2, wherein it comprises several second electrodes, and in that each second electrode is fed separately.

8. (new): The device as claimed in claim 2, wherein the pattern of the second electrode covers substantially a circle of at least 9 mm in diameter.

9. (new): The device as claimed in claim 3, wherein the pattern of the second electrode covers substantially a circle of at least 9 mm in diameter.

10. (new): The device as claimed in claim 2, wherein it comprises a second non-dedicated part.

11. (new): The device as claimed in claim 3, wherein it comprises a second non-dedicated part.

12. (new): The device as claimed in claim 4, wherein it comprises a second non-dedicated part.
